Summary

As a professional in the field of Computer Science Engineering with a specialization in **Software engineering**, I am keen to apply my theoretical and technical knowledge to contribute to the development of innovative technologies in a professional environment.

Education

National School of Computer Science (ENSI)

National Engineering Degree in Computer Science, specialty Software Engineering

2021 – 2024

University of Mannouba

Preparatory Institute for Engineering Studies of Tunis(IPEIT)

Preparatory Cycle University Degree in Mathematics and Physics

2019 – 2021

Tunis

Kairouan Pilot High School (LPK)

Bachelor's Degree in Mathematics

2015 – 2019

Kairouan

Experience

Software Engineer

Oct 2024 – Present

FIS

Tunis, Tunisia

- **Feature Development:** Implement new functionalities based on Jira tickets using C++ and Python.
- **Testing & Code Coverage:** Write and maintain tests to ensure functionality and improve code coverage.
- **Build & Integration:** Compile and run build files to validate new features on FIS products.
- **AI-Assisted Development:** Develop and leverage AI agents and prompt-engineering solutions to support code reviews, feature implementation, Jira ticket analysis, and workflow automation.
- **Agile Workflow:** Collaborate in an Agile environment, participating in sprint planning and reviews.
- **Technologies:** C++, Python, Git, Jira, Jenkins, Bitbucket, AI Agents, Prompt Engineering.

Web Development Internship

Jan 2024 — June 2024

Talan

Tunis, Tunisia

- **Platform Design:** Worked in a Scrum Agile team consisting of a Scrum Master, a Product Owner, and 3 developers.
- **Back-End Development:** Use NodeJS to implement the logic for managing online stores, including product and order management.
- **Front-End Development:** Create an intuitive user interface using ReactJS, allowing users to customize their e-commerce site in real-time with a live preview of the changes.
- **CI/CD implementation with Jenkins and Kubernetes in a cloud environment:** Developed Docker containers and automated build processes with Jenkins for continuous integration, leveraging Kubernetes for efficient deployment and management of the application.
- **Technologies:** NodeJS, ReactJS, Mysql, Git, Jira, Jenkins, Docker, kubernetes, Cloud.

Internship in DevOps

June 2023 — Aug 2023

ADERFIA INC

Kairouan, Tunisia

- **Working in Teams:** Collaborated with a team of 7 members, including 3 backend developers, 2 frontend developers, and 2 DevOps engineers, to develop and deploy microservices architecture.
- **Database Management:** Enhanced data management efficiency by 20% through the implementation of MongoDB as the database for data storage, designing data schemas, and managing data access.
- **Containerization with Docker and Build Automation with Jenkins:** Created Docker containers for the microservices and their dependencies, ensuring easier and reproducible production deployment. Set up Jenkins to automate the source code build processes upon each change, including unit and integration testing.
- **Technologies:** NestJs, MongoDB, RabbitMQ, Git, Jenkins, Docker, kubernetes, Cloud

Technical Skills

Programing Languages: Python, C#, C/C++, Java, JavaScript, TypeScript, SQL.

Markup Languages: HTML, CSS.

Frameworks/Libraries: ExpressJS, NestJS, ReactJS, React Native, Flask, .NET, Spring Boot, Angular, Django, Laravel, Symfony, Bootstarp.

Developer Tools: VS Code, Eclipse IDE, Android Studio.

DBMS: Oracle Database, Mysql, Mongodb, Elasticsearch.

Data Visualization Libraries: Matplotlib, Seaborn, Scikit-learn, Tensorflow.

Mathematics Knowledge: Statistics, Probability, Linear Algebra, Graph Theory.

Communication : Arabic (Native), English (Fluent), French (Fluent), German(Beginner), Spanish(Beginner)
